

@stats

Appears in: **DL-06**

server/routers/stats.py:9-44

"The stats reading works everything out from the current state and the scheduler at the moment it is asked ... refreshing on the same five-second poll as the rest of the dashboard (@stats)."

@stats

server/routers/stats.py:9-44

```
9  @router.get("")
10 def get_stats():
11     log        = state.agent_log
12     approvals  = state.approvals
13
14     pending    = [a for a in approvals if a["status"] == "pending"]
15     auto       = [e for e in log
16                   if e.get("decision") not in ("human_approved", "human_rejected", "score_updated")
17                   and not e.get("metadata", {}).get("requires_human")]
18     human      = [e for e in log if e.get("decision") in ("human_approved", "human_rejected")]
19     ema_updates = [e for e in log if e.get("decision") == "score_updated"]
20
21     total      = len(log)
22     auto_count  = len(auto)
23     human_count = len(human)
24     queue_value = sum(a.get("po_total") or 0 for a in pending)
25
26     last_run_entry = next(
27         (e for e in reversed(log) if e.get("trigger") == "pipeline_run"), None
28     )
29
30     job        = scheduler.get_job("betsy_auto_run") if scheduler.running else None
31     next_run    = job.next_run_time.isoformat() if job and job.next_run_time else None
32
33     return {
34         "decisions_total": total,
35         "decisions_auto": auto_count,
36         "decisions_human": human_count,
37         "ema_updates": len(ema_updates),
38         "auto_rate_pct": round(auto_count / total * 100, 1) if total else 0.0,
39         "pending_approvals": len(pending),
40         "queue_value_eur": round(queue_value, 2),
41         "last_run": last_run_entry["timestamp"] if last_run_entry else None,
42         "scheduler_active": scheduler.running,
43         "next_run": next_run,
44     }
```

What it shows: GET /api/stats derives the five figures (total decisions, autonomous rate, pending approvals, queue value, next run) from live state + the scheduler's next_run_time.
