*"The AI narrative is generated in the browser from that same data — no model call needed for the summary."
... "That is about twenty lines of plain JavaScript in @betsy."*

@betsy — narrative

[dashboard/betsy.html:983-1017](#)

```
983 function buildNarrative(inventory, agentLog, pendingApprovals) {
984   const critical = inventory.filter(i => riskOf(i) === 'critical');
985   const watching = inventory.filter(i => riskOf(i) === 'watch');
986   const recentLog = [...(agentLog || [])].slice(-10);
987   const autoOrders = recentLog.filter(e => e.decision === 'generate_po' && !e.metadata?.requires_human);
988   const pending = pendingApprovals || [];
989   const dupeFlags = recentLog.filter(e => e.decision === 'flag_duplicate');
990
991   const sentences = [];
992
993   if (critical.length === 0 && pending.length === 0 && dupeFlags.length === 0) {
994     sentences.push('Everything looks good right now. Inventory levels are healthy and there are no outstanding issues.');
```

995 } else {

996 if (critical.length > 0) {

997 const names = critical.map(i => i.name).join(' and ');

998 if (autoOrders.length > 0) {

999 sentences.push(`\${names} \${critical.length > 1 ? 'were' : 'was'} critically low — I've already placed the order\${autoOrders.length > 1 ? 's' : ''} automatically.');

1000 } else {

1001 sentences.push(`\${names} \${critical.length > 1 ? 'are' : 'is'} critically low and may need attention.');

1002 }

1003 }

1004 if (watching.length > 0) {

1005 const names = watching.map(i => i.name).join(' and ');

1006 sentences.push(`\${names} \${watching.length > 1 ? 'are' : 'is'} worth watching — stock is getting lower.');

1007 }

1008 if (dupeFlags.length > 0) {

1009 sentences.push(`I flagged \${dupeFlags.length} possible duplicate invoice\${dupeFlags.length > 1 ? 's' : ''} for the finance team.');

1010 }

1011 if (pending.length > 0) {

1012 sentences.push(`\${pending.length} item\${pending.length > 1 ? 's' : ''} need : 'needs' your call before I can act.');

1013 }

1014 }

1015 return sentences.join(' ');

1016 }

1017 }

What it shows: `buildNarrative()` — the ~20 lines that turn live inventory + agent-log into the plain-English summary ("...was critically low — I've already placed the order automatically.") with no LLM call.
