

Betsy -- Wireframes

Two design directions explored. The first is a standalone dashboard for Jenny. The second (current direction) follows enterprise AI tool patterns -- AI as a layer on top of familiar data surfaces.

Version 1 -- Standalone Dashboard (4 screens)

Pattern: dedicated app with sidebar navigation

Screen 1 -- Home

```
????????????????????????????????????????????????????????????
? ? Betsy                               Last checked: 2m ago ?
? "I'm keeping an eye on things."      ?
????????????????????????????????????????????????????????????-?
? ?? 1          ? ? 3          ? ? 0          ?
? Need your ? Handled ? Critical          ?
? approval ? automatically? alerts        ?
? [Review ->] ?          ?                  ?
????????????????????????????????????????????????????????????
? RECENT ACTIVITY                        ?
? ??????????????????????????????????????????????????????????? ?
? ? Ordered 500x Steel Bolts M8 from FastParts Co. 3h ago ?
? ? Ordered 200x Hydraulic Seals from QuickShip 6h ago ?
? ?? Price spike on Copper Wire -- waiting for you 8h ago ?
????????????????????????????????????????????????????????????
```

Screen 2 -- Pending Approvals (HITL core)

```
????????????????????????????????????????????????????????????
? <- Back          YOUR APPROVAL NEEDED          1 item      ?
????????????????????????????????????????????????????????????
? ??????????????????????????????????????????????????????????? ?
? ? ?? Copper Wire -- price looks unusual          ? ?
? ?                                                    ? ?
? ? What's happening                                ? ?
? ? The usual price is ?4.20/m. Today all suppliers    ? ?
? ? are quoting ?6.80-?7.10/m -- 60% higher than normal.? ?
? ?                                                    ? ?
? ? What I'd normally do                            ? ?
? ? Order 300m from BulkSupply Co. for ?2,040 total.  ? ?
? ?                                                    ? ?
? ? Why I'm asking you instead                      ? ?
? ? This kind of jump usually means a market issue or ? ?
? ? a data error. You know better than I do.         ? ?
? ?                                                    ? ?
? ? Betsy's confidence: ????????? 55%                ? ?
? ?                                                    ? ?
? ? [ ? Yes, go ahead ] [ ? No, skip this ] ? ?
? ??????????????????????????????????????????????????????????? ?

```

Design Principles Applied

Principle	How Betsy applies it
AI is a layer, not a separate app	Betsy sits on top of inventory/supplier data, doesn't replace it
Outputs short and actionable	Narrative is 2-3 sentences, every section has a button
Clear "generated by AI" signal	? mark on all AI-produced columns and cards
Familiar work surfaces	Tables look like any procurement table -- one column is AI
Confidence visible	????? dots on every AI-generated recommendation
